THE INTELLIGENCE BENEATH THE VIOLENCE

AI-RISA Premium Fight Report  
Report Type: Premium Fight Intelligence Report

FIGHTER A

Alex Pereira

Alex Pereira (model-derived edge)

VS

54% (model-derived)

FIGHTER B

Jiri Prochazka

Model-derived counter lane

UFC 300

Event Date: 2026-09-21

CONTROL LENS

Pressure rhythm, reset denial, and scoring geography

DANGER ZONE

Geography loss, rushed entries, and output without conversion

CONFIDENCE BAND

52-60% (model-derived)

HEADLINE PROJECTION

Alex Pereira enters with the clearest control lane if the fight stays at a pressure-to-reset cadence. The tactical thesis is simple: deny Jiri Prochazka clean geography, win the first re-entry after every break, and make late-round reads expensive. If Jiri Prochazka turns the fight into clean, countable exchanges, the edge compresses quickly.

Fight Intelligence Dashboard

Executive Command Dashboard

Projected Edge

Alex Pereira (model-derived edge)

Confidence Band

52-60% (model-derived)

Volatility Band

High (model-derived)

Method Pathway

Decision (model-derived)

Control Zone

Pressure rhythm / reset denial Alex Pereira enforces scoring geography with layered exits.

Danger Zone

Geography loss / rushed entry Jiri Prochazka gains leverage when counters stay clean and repeatable.

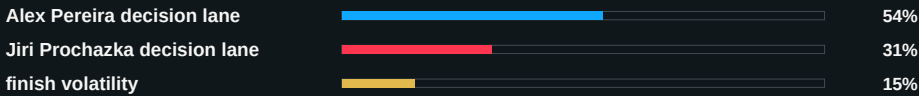

Collapse Trigger

Defensive hand decay Two consecutive rounds of broken timing can flip card authority quickly.

Round Control Snapshot

R1 read phase | R2 pressure spike | R3 consolidation | R4 decay check | R5 volatility close.

Method Probability Mini Chart

Command Read

Model-derived: Alex Pereira wins by preserving scoring geography and reset denial; Jiri Prochazka flips only with clean counter timing. Treat this board as probabilistic intelligence. Preserve lane discipline and downgrade confidence when visual/data cues diverge.

Fighter Overview / Tale of the Tape

Alex Pereira vs Jiri Prochazka | model-derived unless source-confirmed

Record: model-derived 34-3 (model-derived)  
Alex Pereira BLOCK  
Stance: model-derived orthodox (model-derived)  
Age: model-derived 35 (model-derived)  
Height: model-derived 196 cm (model-derived)  
Reach: model-derived 203 cm (model-derived)

VS

Record: model-derived 26-4 (model-derived)  
Jiri Prochazka BLOCK  
Stance: model-derived orthodox (model-derived)  
Age: model-derived 30 (model-derived)  
Height: model-derived 188 cm (model-derived)  
Reach: model-derived 196 cm (model-derived)

Interpretation

Physical profile, style profile, pressure pattern, scoring route, danger route, and coach meaning are aligned to the matchup signal. Alex Pereira vs Jiri Prochazka is a contest between pressure rhythm and counter structure. Control lane: Alex Pereira should force layered entries, crowd the reset window, and score before the exit is free. Danger lane: Jiri Prochazka can flip the fight if the entries get rushed, the hands decay defensively, or the output is not converted into position. Command read: keep exits layered, do not chase low-value pressure, and make every exchange pay for itself.

Tactical Thesis

Coach Meaning

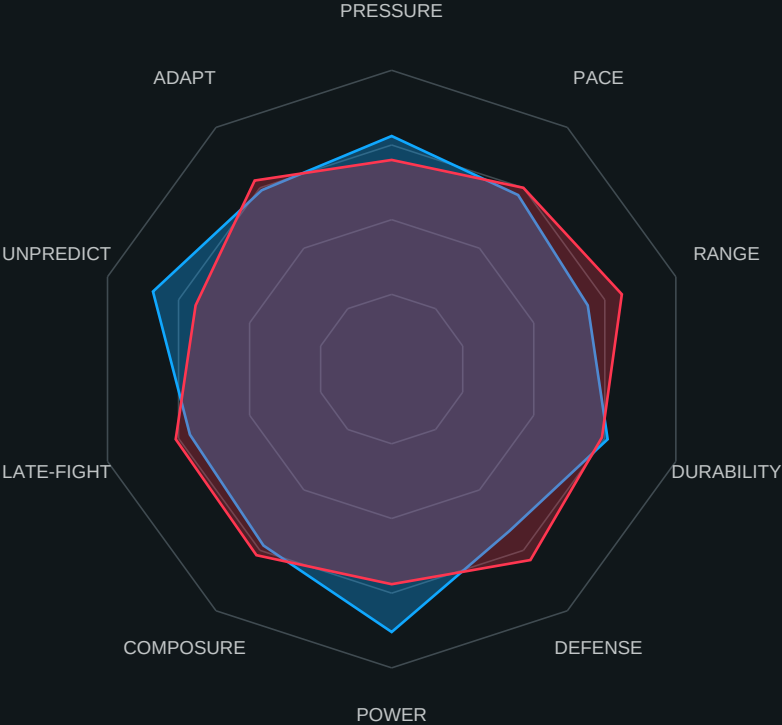

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

Fighter Architecture Radar

Control Lane

Alex Pereira pressure rhythm and reset denial become the scoring driver if exits are layered.

Danger Lane

Jiri Prochazka flips momentum if range control and counter-entry timing stay clean in the mid rounds.

Watch Cue

If the second reset after contact is still controlled by the same fighter, that round is likely decisive on cards.

Failure Consequence

Rushed entry volume without positional conversion creates visible scoring leakage and late-round volatility.

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

Tactical Edge Map

Tactical Edge Table

| Tactical Layer         | Edge      | Confidence           | Why It Matters                                                     | Watch Cue                                  |
|------------------------|-----------|----------------------|--------------------------------------------------------------------|--------------------------------------------|
| Pressure Rhythm        | Fighter A | Model-derived 58%    | Layered pressure plus reset denial creates repeatable scoreable    | Watch if exits are forced twice in one     |
| Counter Entry Timing   | Fighter B | Model-derived 33%    | Clean exits and counter sequencing reduce pressure efficiency and  | Watch delayed counters after reset feints. |
| Range Geography        | Contested | Model-derived 54%    | Who owns mid-range after first contact controls volume quality and | Watch center-line denial after contact.    |
| Pocket Exit Discipline | Fighter A | Model-derived 52-60% | Disciplined exits prevent swing-variance exchanges and preserve    | Watch defensive hand return on exits.      |
| Late-Round Reliability | Volatile  | Model-derived high   | Fatigue and composure shifts can overturn prior lane control when  | Watch R4-R5 composure under pace           |

Command Instruction

Keep exits layered, do not chase low-value pressure, and preserve scoring geography before forcing pace extensions.

Failure Consequence

If pressure output rises while positional conversion falls, the card drifts toward the cleaner counter lane.

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

Decision Structure

SECTION LENS

Decision Structure

MODEL STATUS

model-derived unless source-confirmed

ROUND BAND

R2-R4 (model-derived inflection band)

REPORT TYPE

Premium Fight Intelligence Report

Decision structure: the judge-friendly route belongs to the fighter who owns scoring geography without overcommitting. Alex Pereira needs pressure rhythm, reset denial, and angle closure that prevents clean counters. Jiri Prochazka needs disciplined counter-entry timing, ring awareness, and enough repeatable output to keep the scorecard narrow. Watch cue: if Jiri Prochazka is forced to defend twice in the same sequence, Alex Pereira is likely dictating the round. Failure consequence: a high-volume but low-conversion round becomes a point loss instead of a control round.

Tactical Thesis

Decision structure: the judge-friendly route belongs to the fighter who owns scoring geography without overcommitting. Alex Pereira needs pressure rhythm, reset denial, and angle closure that prevents clean cou...

Mechanism

Model-derived mechanism: Alex Pereira pressure geometry versus Jiri Prochazka clean counter timing.

Fighter A Pathway

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Fighter B Counter-Pathway

Jiri Prochazka flips momentum through layered counters, clean exits, and reduced

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

Energy Use Analysis

SECTION LENS

Energy Use Analysis

MODEL STATUS

model-derived unless source-confirmed

ROUND BAND

R2-R4 (model-derived inflection band)

REPORT TYPE

Premium Fight Intelligence Report

Energy profile: Alex Pereira spends energy in pressure bursts and must convert those bursts into position, not just activity. Jiri Prochazka spends more economically when the fight stays readable, but the cost rises quickly if the resets disappear. Watch cue: repeated forced exits or defensive hand decay will tax the slower processor first. Failure consequence: style starts to degrade before cardio visibly fails.

Tactical Thesis

Energy profile: Alex Pereira spends energy in pressure bursts and must convert those bursts into position, not just activity. Jiri Prochazka spends more economically when the fight stays readable, but the cost ...

Mechanism

Model-derived mechanism: Alex Pereira pressure geometry versus Jiri Prochazka clean counter timing.

Fighter A Pathway

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Fighter B Counter-Pathway

Jiri Prochazka flips momentum through layered counters, clean exits, and reduced

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

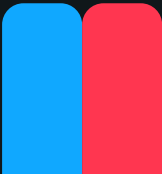

Fatigue Failure Points

Failure Heat Map | Body Risk Heat Map / Anatomical Risk Map

| Category      | Alex Pereira Risk | Jiri Prochazka Risk | Watch Cue               |
|---------------|-------------------|---------------------|-------------------------|
| Gas Tank      | 41% model-derived | 34% model-derived   | watch reset speed under |
| Defense       | 46% model-derived | 38% model-derived   | watch defensive hand    |
| Composure     | 39% model-derived | 36% model-derived   | watch reset speed under |
| Range Control | 44% model-derived | 31% model-derived   | watch reset speed under |
| Pocket Exits  | 43% model-derived | 35% model-derived   | watch defensive hand    |

Watch Cue

Monitor defensive hand decay and delayed reset speed in R2-R4. These are model-derived trigger lanes.

Interpretation

Red/blue split indicates comparative vulnerability by zone for Alex Pereira and Jiri Prochazka. Values remain model-derived unless source-confirmed.

Body Risk Heat Map Interpretation

Body Risk Heat Map and Anatomical Risk Map are model-derived unless source-confirmed. In this matchup, exposure spikes when Alex Pereira forces pace without positional conversion or Jiri Prochazka loses reset timing. Round Band: R2-R4 is the inflection lane.

Failure Consequence

If composure and pocket exits decay together, one momentum swing can override earlier control reads.

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

Mental Condition Under Stress

SECTION LENS

Mental Condition Under Stress

MODEL STATUS

model-derived unless source-confirmed

ROUND BAND

R2-R4 (model-derived inflection band)

REPORT TYPE

Premium Fight Intelligence Report

Mental layer: Alex Pereira is strongest when the fight feels unstable, because disruption amplifies his confidence. Jiri Prochazka is strongest when the fight stays orderly, because clean decision-making is part of his value. Command instruction: if the rhythm breaks, reset immediately instead of forcing the next exchange. Watch cue: the first visible hesitation after a momentum swing usually predicts the next scored sequence.

Tactical Thesis

Mental layer: Alex Pereira is strongest when the fight feels unstable, because disruption amplifies his confidence. Jiri Prochazka is strongest when the fight stays orderly, because clean decision-making is par...

Scenario Tree / Method Pathways. Pathway A (model-derived 58%): Alex Pereira pressure conversion wins by controlling geography and making the scorecard look inevitable. Pathway B (model-derived 33%): Jiri Prochazka counter-scoring keeps the fight close by staying disciplined and punishing rushed entries. Pathway C (model-derived 9%): a swing-variance turn appears if one fighter loses discipline and gives the other a full round of momentum.

Tactical Thesis

Scenario Tree / Method Pathways. Pathway A (model-derived 58%): Alex Pereira pressure conversion wins by controlling geography and making the scorecard look inevitable. Pathway B (model-derived 33%): Jiri Proch...

Mechanism

Model-derived mechanism: Alex Pereira pressure geometry versus Jiri Prochazka clean counter timing.

Fighter A Pathway

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Fighter B Counter-Pathway

Jiri Prochazka flips momentum through layered counters, clean exits, and reduced

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

Scorecard Scenario

Projection / model-derived score pathways

| Path         | Likely Card | Driver                             | Volatility |
|--------------|-------------|------------------------------------|------------|
| Primary lane | 48-47       | Pressure conversion + reset denial | Medium     |
| Counter lane | 47-48       | Clean exits + punished entries     | High       |
| Swing lane   | 47-47       | Late momentum reversal             | Very high  |

Scorecard Commentary

Scorecard Scenario (model-derived): 48-47 primary lane when control geography holds, 47-48 upset lane when counter timing remains clean across the middle rounds, and 47-47 volatility lane if one late momentum swing overrides early control.

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.

Stoppage Windows

Method Probability Chart

All percentages are model-derived and normalized for this matchup projection path.

Mechanism

Decision lanes dominate when control geometry survives late rounds. Stoppage lanes rise only when composure and pocket exits fail together.

Risk Control

Treat method read as probabilistic support, not certainty. Re-score after each round-band shift.

Coach Meaning

Prioritize lane discipline and reset quality before pace extension to preserve score authority.

Buyer Meaning

Edge is probabilistic with volatility; allocate exposure as scenario-weighted rather than absolute.
