3. What The Evidence Pack Proves

- AI-RISA completed a controlled three-fight validation batch.
- The batch showed repeatable structured prediction handoff.
- The batch showed explainable scoring logic.
- The batch showed supported structural evidence across the locked evidence set.
- The batch recorded mixed accuracy results transparently.
- The batch recorded zero protected writes.
- Customer release has not yet been authorized.
- Public publishing has not yet been authorized.
- Production launch has not yet been authorized.

AI-RISA Controlled Validation Evidence Pack - Batch 2 Minimum Proof

4. Batch 2 Evidence Summary

Fight	Accuracy	Winner	Method	Round	Structural Evidence
Kayla Harrison vs Holly Holm	partial	hit	miss	miss	supported (1.0)
Bo Nickal vs Cody Brundage	partial	hit	miss	miss	supported (1.0)
Zhang Weili vs Yan Xiaonan	hit	hit	hit	hit	supported (1.0)

Accuracy distribution: 2 partial, 1 hit. Mixed accuracy results are shown transparently.

AI-RISA Controlled Validation Evidence Pack - Batch 2 Minimum Proof

5. Structured Prediction Handoff Explanation

Batch workflow summary:

- Button 2 emits structured prediction fields for comparison-ready analysis.
- Button 3 consumes structured prediction fields for official-result comparison.
- The evidence set demonstrated repeatable structured prediction handoff across the locked three-fight batch.

AI-RISA Controlled Validation Evidence Pack - Batch 2 Minimum Proof

6. Explainable Scoring and Mixed Accuracy Transparency

- Scoring logic is explainable and evidence-linked.
- Scheduled-round context informs method and round interpretation.
- mixed accuracy results are expected in controlled validation and are reported transparently.
- This document does not imply guaranteed outcomes.

AI-RISA Controlled Validation Evidence Pack - Batch 2 Minimum Proof

7. Structural Evidence and Zero Protected Writes

- Structural evidence supported across the locked evidence set.
- zero protected writes recorded in the locked Batch 2 evidence.
- Validation scope is limited to the locked Batch 2 evidence set.

AI-RISA Controlled Validation Evidence Pack - Batch 2 Minimum Proof

8. Disclaimer and FAQ

AI-RISA does not guarantee fight outcomes. This product is validation evidence, not betting advice. Accuracy results are mixed and shown transparently. Validation scope is limited to the locked Batch 2 evidence set. Automated learning and customer release are not activated in the current evidence state.

Validation evidence only. Not betting advice. No outcome guarantee.

Q: What is this product?

A: A controlled validation evidence pack showing locked Batch 2 minimum-proof results, including repeatable structured prediction handoff, explainable scoring logic, supported structural evidence, mixed accuracy results, and zero protected writes.

Q: Does AI-RISA guarantee fight results?

A: No. AI-RISA does not guarantee fight outcomes, winner accuracy, method accuracy, or round accuracy.

Q: Is this betting advice?

A: No. This product is validation evidence, not betting advice.

Q: Is AI-RISA fully launched?

A: No. Customer release, public publishing, production launch, automated delivery, and learning activation are not authorized in the current governance state.
