8. Buyer FAQ

Q: What was validated? A: Repeatable structured handoff, explainable scoring, supported structural evidence, and zero protected writes across three fights.

Q: Why are outcomes mixed? A: Validation prioritized behavior transparency and safety boundaries, not forced perfect outcomes.

Q: How should this be used? A: As transparent validation evidence for informed product evaluation.

Q: What is outside this scope? A: Generalization beyond the locked Batch 2 evidence set.

This pack is validation evidence, not betting advice.
