VOLATILITY

Mixed

2 partial / 1 hit

EXECUTIVE SUMMARY

Structured handoff, normalization, and structural evidence passed across the locked Batch 2 validation set. External release remains blocked.

CONTROL LENS / VALIDATION ZONE

Structured prediction handoff, normalized scoring, and source traceability remain the control lane.

DANGER LENS / RELEASE BOUNDARY

Risk increases if the document implies sale, customer delivery, public launch, automated delivery, or learning activation.

COMMAND READ / OPERATOR HOLD

Keep the product internal until the operator changes the release-scope decision and all release gates are revalidated.

VALIDATION CONTROL INTELLIGENCE STRIP

CONTROL OBJECTIVE

Bound claims to locked Batch 2 evidence.

DANGER OBJECTIVE

Reject customer-ready or guarantee language.

WATCH CUE

Check every claim against source locks.

OPERATOR COMMAND

Maintain INTERNAL_ONLY.

VALIDATION CONTROL

HEADLINE VALIDATION READ

Batch 2 proves repeatable structured handoff, normalized scoring interpretation, supported structural evidence, and mixed accuracy reporting without external release authorization.

CONTROL LENS

Evidence remains bounded.

DANGER LENS

Release language can contaminate trust.

COMMAND READ

Preserve internal-only governance.

VALIDATION EVIDENCE SNAPSHOT

The evidence pack shows a controlled validation batch, not a prediction guarantee. Mixed results remain visible, and no customer-facing release authority is implied.

CONTROL LENS

Evidence remains bounded.

DANGER LENS

Release language can contaminate trust.

COMMAND READ

Preserve internal-only governance.

VALIDATION ARCHITECTURE RADAR

ARCHITECTURE READ

Validation architecture is strongest where structured handoff, normalization, and boundary discipline stay connected.

CUSTOMER MEANING

The product shows how AI-RISA explains its evidence without pretending to guarantee outcomes.

OPERATOR USE

- CONTROL** Evidence clarity
- DANGER** Release implication
- FLIP** Unsupported claim

Validation Edge Map

Validation Layer	Edge Model	Why It Matters	Watch Cue
Structured handoff	3/3	Keeps prediction evidence machine-readable.	Check contract fields.
Normalization	3/3	Prevents method/round comparison errors.	Check normalized scoring.
Structural evidence	3/3	Supports claim quality across the batch.	Check evidence score.
Boundary safety	INTERNAL_ONLY	Blocks premature sale or delivery.	Check release wording.

Evidence Command

Keep claims bounded to source-backed validation evidence.

Failure Consequence

If traceability or boundary language fails, release remains blocked.

DECISION CHAIN

A LOOP

Evidence proof

B LOOP

Boundary control

DECISIVE QUESTION

Can proof be shown without release

WATCH CUE

Does wording imply customer

DECISION STRUCTURE

The decision structure separates internal validation from release authority. Proof can improve the product, but it does not authorize customer delivery, public publishing, production launch, automation, or learning activation.

CONTROL LENS

Evidence remains bounded.

DANGER LENS

Release language can contaminate trust.

COMMAND READ

Preserve internal-only governance.

SOURCE CHAIN

PRODUCT	AI-RISA Controlled Validation Evidence Pack - Batch 2 Minimum Proof
SKU	AI-RISA-EVIDENCE-PACK-BATCH2-MIN-PROOF-V1
VALIDATION BATCH	Batch 2 Minimum Proof
PREVIEW ARTIFACT	ai_risa_evidence_pack_exact_premium_clone_v18_preview.pdf
RELEASE SCOPE	INTERNAL_ONLY
STATUS	Source traceable / internal review only
SOURCE LOCKS	premium visual lock + operator release decision

External release remains blocked unless the operator changes the release-scope decision and all release gates are revalidated.

NO GUARANTEE

Validation evidence only

NOT BETTING ADVICE

No outcome guidance

INTERNAL ONLY

No customer release

NO AUTOMATION

No learning activation

RISK CONTROL STANDARD

AI-RISA does not guarantee fight outcomes. This product is validation evidence, not betting advice. Accuracy results are mixed and shown transparently. Validation scope is limited to the locked Batch 2 evidence set. Automated learning and customer release are not activated in the current evidence state.

SHORT DISCLAIMER

Validation evidence only. Not betting advice. No outcome guarantee.

INTERNAL ONLY

No external release

NO PUBLIC PUBLISHING

No open posting

NO AUTOMATED DELIVERY

Manual review only

NO LEARNING ACTIVATION

No result-learning change

GOVERNANCE STOP-STATE

Batch 2 remains in an internal-only validation state. Customer release, public publishing, production launch, automated delivery, and learning activation remain blocked.

1. Customer release is NOT authorized.
2. Public publishing is NOT authorized.
3. Production launch is NOT authorized.
4. Automated delivery is NOT authorized.
5. Learning activation is NOT authorized.

FINAL STOP-STATE

Internal visual QA and product refinement only. No external release operations authorized.
